Food Establishment Type II	$430.00
Food Establishment Type III	$590.00
Food Establishment Type IV	$640.00

Note: A $60.00 Liquid Waste Generator Fee will be added to permits that generate fats, oils and grease.

Permit Type Definitions

- **Retail Food Store Type I:**
  Establishment that serves and/or sells prepackaged Time/Temperature Control for Safety (TCS) and non-TCS food items. Establishment does not engage in portioning activities including, but not limited to, meat market, bakery, and deli operations.

- **Retail Food Store Type II:**
  Establishment that serves and/or sells prepackaged and non-prepackaged TCS and non-TCS food items. Establishment engages in portioning activities including but not limited to meat market; bakery; and deli operations. No cooking or hot holding of TCS or non-TCS food is done onsite.

- **Retail Food Store Type III:**
  Establishment that serves and/or sells prepackaged and non-prepackaged TCS and non-TCS food items. Establishment engages in portioning activities including but not limited to meat market; bakery; and deli operations. Establishments that have an extensive menu and handling of raw ingredients. Complex preparation including cooking, cooling, and reheating for hot holding involves many TCS foods. Variety of processes require hot and cold holding of TCS food.

- **Food Establishment Type I:**
  Establishment that serves or sells only pre-packaged, non-TCS foods. Establishments that prepare only non-TCS foods. Establishments that heat only commercially processed TCS foods for hot holding. No cooling of TCS foods.

Establishments that would otherwise be grouped in Category 2 but have shown through historical documentation to have achieved active managerial control of foodborne illness risk factors.

- **Food Establishment Type II:**
  Establishments that serve mostly products that are prepared/cooked and served immediately. May involve hot and cold holding of TCS foods after preparation or cooking. Complex preparation of TCS foods requiring cooking, cooling, and reheating for hot holding is limited to a few TCS foods. Establishments that would otherwise be grouped in Category 3 but have shown through historical documentation to have achieved active managerial control of foodborne illness risk factors. Newly permitted establishments that would otherwise be grouped in Category 1 until history of active managerial control of foodborne illness risk factors is achieved and documented.

- **Food Establishment Type III:**
  Establishments that have an extensive menu and handling of raw ingredients. Complex preparation including cooking, cooling, and reheating for hot holding involves many TCS foods. Variety of processes require hot and cold holding of TCS food. Establishments that would otherwise be grouped in Category 4 but have shown through historical documentation to have achieved active managerial control of foodborne illness risk factors. Newly permitted establishments that would otherwise be grouped in Category 2 until history of active managerial control of foodborne illness risk factors is achieved and documented.

- **Food Establishment Type IV:**
  Establishments serving a highly susceptible population or that conduct specialized processes (e.g. smoking and curing, reduced oxygen packaging for extended shelf-life).
